

TRANCE ADVANCED PRO 29

INTRODUCTION

Amp up your trail-riding speed with this lively 29er that climbs, descends and rails rugged singletrack. With its lightweight composite frameset and progressive frame geometry, it delivers smooth-riding confidence on the trickiest terrain.

OVERVIEW

The Trance Advanced Pro 29 features a full composite frame that's fitted with our most up-to-date Maestro suspension. The Advanced Forged composite rocker arm and trunnion-mount shock help produce 115mm of smooth rear-wheel travel that's active and sensitive to small bumps, giving you killer traction and confident control. The frame geometry is updated with progressive headtube and seattube angles, shorter chainstays and a longer toptube - all engineered to balance the speed and control of its 29-inch wheels with the quickness and agility you need to rail corners, hammer through rock gardens and do it all with confidence and control.

KEY PERFORMANCE FACTORS

29er confidence and control: Larger 29-inch diameter wheels roll over rough terrain with balance and stability, giving you the momentum to tackle technical climbs and the confidence to fly on fast, rugged singletrack descents.

Progressive suspension: Maestro rear suspension features a trunnion mount shock with a longer stroke and smoother feel. With 115mm of full rear-wheel travel (and 130mm up front), it has an Advanced Forged Composite upper rocker arm for increased stiffness and strength plus lower overall frame weight.

Trail-tuned chassis: The lightweight Advanced-grade composite frameset features fast trail-riding geometry including an aggressive 66.5-degree headtube angle and 74.5-degree seattube angle, plus a 44mm fork offset. The result is agile and efficient climbing capabilities plus added control for high-speed descents.
