

TRANCE X ADVANCED PRO 29

INTRODUCTION

Extra travel, extra fun. From rowdy enduro runs to backcountry missions on steep, chunky singletrack, this new composite 29er builds on the Trance 29 platform with beefed up suspension and adjustable frame geometry.

OVERVIEW

This new member of the Trance family is designed with a longer travel suspension setup for added control on the most challenging trails. The full composite frame is engineered for 135mm of rear travel and 150mm up front. The Maestro rear suspension has a two-stage adjustable Advanced Forged Composite rocker arm with a trunnion-mount shock. The flip-chip equipped rocker arm lets you adjust frame geometry for your own riding style and terrain. To fine tune the ride, you can choose a steeper or slacker headtube angle (66.2 or 65.5 degrees) and seattube angle (77.9 or 77.2), which results in either a 30mm or 40mm bottom bracket drop. And it's all built around 29-inch wheels for added stability on rugged terrain.

KEY PERFORMANCE FACTORS

29er confidence and control: 29-inch wheels roll over rough terrain with balance and stability, giving you more momentum for technical climbs and the confidence to fly on fast, rugged singletrack descents. Added clearance for up to 2.5-inch tyres.

Progressive suspension: New Maestro rear suspension features a trunnion mount shock with a longer stroke and smoother feel. With 135mm of full rear-wheel travel (and 150mm up front), it features a two-position adjustable Advanced Forged Composite flip-chip upper rocker arm for increased stiffness and strength plus lower overall frame weight.

Adjustable frame geometry: Lightweight Advanced-grade composite frameset features adjustable geometry that offers 66.2 or 65.5-degree headtube and 77.9 or 77.2-degree seattube angles, resulting in 30mm or 40mm bottom bracket drop options for aggressive trail configurations.
